

Stardust Sample Request

When to Make Them

The Stardust Sample Allocation Committee (SSAC) meets at the end of each month to review and process the previous month's sample request submissions. As a result, investigators wishing for their sample allocation request to be considered for that month must have the request submitted to the SSAC by the 15th of each month. This permits the requested to be circulated among the SSAC members for review prior to their meeting. Request received after the 15th will be reviewed in the next month.

The necessary forms to make a sample allocation request can be found on this website, or by clicking [here](#).
